Adare

LAMINATE

Beautiful but Tough

Add larger than life style to your home with our Adare Laminate flooring collection.

Featuring an extra long 2200mm plank with 12mm construction, the Adare range of Laminate flooring includes eight gorgeous décors. Carefully selected by our colour specialist, each décor brings a unique feeling, while all are certain to add a stylish, creative, and modern look to your space. These Oak inspired designs are all embossed in register, so you can enjoy a real feel as well as a true to life look, and with a mixture of both warm and cool tones throughout the collection, versatility is assured.

These child and pet friendly floors have an AC4 rating – meaning they're strong enough to easily withstand everyday life – and they're suitable for installation in both high traffic residential areas and general commercial spaces. The superior UNICLIC® locking system improves stability, performance and ease of installation. Plus, 72 hour spill protection means you don't have to panic if the little ones drop their drink.

Featuring a 50/50 split of predominantly grey and more colourful shades, the Adare range lends itself well to both modern and traditional aesthetics. Make use of Caramel Oak or Forest Oak if you're looking for an old-world luxury type feeling, or, install Dolce Oak to keep things modern and light. Those looking to find a balance between rustic luxe and contemporary style will do well with Frappe Oak within their homes and Arctic Oak offers the perfect base for a cool, calm and collected ultra-modern space. Polar Oak and Camira Oak round out the sleek grey-based options within Adare, and Sierra Oak offers a charming twist to this minimalistic shade.

The Adare collection is resistant to general wear and tear as well as staining and features a 25 Year Residential Warranty and 5 Year Commercial Warranty.

Offering eight gorgeous decors, the Adare collection of 12mm, extra-long Laminate floorboards can bring a stylish, modern feel to any home. With 72 hour spill protection and resistance to wear and stains these floors are suitable for installation throughout the home and a wonderful option for those with pets. They also feature an AC4 rating and superior UNICLIC® locking system which is designed to improve floor performance as well as ease of installation. Plus, thanks to their embossed in register design, these floorboards feel as natural as they look.

What is Adare?

Adare is a collection of 2200mm extra long Laminate floorboards available in eight European Oak décors. Featuring a 12mm thick construction, our Adare floors are crafted from the below components:

What are the benefits of Adare Laminate?

The UNICLIC® system features four locking points and allows for two different methods of installation - fold and click. This greatly improves ease of installation while also enhancing the integrity of the lock.

72 hour spill protection helps ensure that the entirety of your new Laminate flooring system is able to withstand the unpredictability of everyday life - whether it's the kids spilling a drink or the pet having an accident.

The Aluminum Oxide wear layer on the Adare collection of flooring helps provide a 100% waterproof surface. It's also highly resistant to scratches, dents, fading and burns.

An Embossed in Register finish means that your floorboards feel as good as they look. With texture designed to perfectly align with the décor, this finish is as close to natural as you can get in Laminate.

Kids and pets are highly unpredictable, and as much as we love them, they can cause havoc in the home. The good news is that the Adare range is highly durable and able to withstand daily life.

An AC4 Abrasion Rating means that all options within the Adare collection are suitable for installation in even the highest traffic areas of the home as well as commercial spaces with heavy foot traffic.

The Adare collection is designed to be low maintenance and easy to clean. Simply follow the Cleaning & Care Guide and enjoy your floors for years to come.

A 25 Year Residential Warranty covers the entire Adare range, so you can install these floors in your home with confidence as long as appropriate guidelines are followed.

A 5 Year Light Commercial Warranty is available when Adare floorboards are installed in commercial settings as long as appropriate guidelines are followed.

As the Adare collection of Laminate flooring has a closed surface which does not trap dust or allergens it is considered an allergy-friendly flooring option.

Adare Laminate FAQs

Where does Adare sit in the Imagine Floors by Airstep product offering?

Adare is the Imagine Floors by Airstep 12mm European Oak collection of Laminate flooring. At 2200mm in length it provides an extra long flooring option for consumers and is the sister range of our Keeta 8mm Laminate floors. These ranges provide an alternative to Australian inspired décors (which can be found in The Eucalyptus Steps Collection) and offer 16 designs between them.

What makes Adare special?

Adare offers eight stunning décors that combine true-to-life aesthetics with an embossed in register design. This means that they are as close to the real deal as possible, with lower maintenance and protection requirements than having Timber flooring in your home. They also feature a UNICLIC® locking system, which allows them to be installed in two different manners, and have an Aluminium Oxide wear layer that makes them highly resistant to scratches, dents, burns, stains and fading.

What is the UNICLIC® lock system?

UNICLIC® is a locking system for floors which has four locking points. This unique set up allows floors to be installed in both a "fold" and "click" method, while also enhancing the stability of the connection between individual floorboards.

What's so good about an Aluminium Oxide coating?

While most types of flooring available for homes has a PU Coating (water based polymer) Laminate floors have an Aluminium Oxide coating. This greatly enhances their resistance to scratches and damage, and means your floors will stay looking, and feeling, better for longer, even in high traffic residential spaces and commercial areas.

What expansion gap is needed?

A minimum of 10mm - 12mm expansion gap is required when installing Adare Laminate. This is standard for all floating floors. All décors within the Adare collection of Laminate flooring from Imagine Floors by Airstep have colour match 20mm scotia available to cover the expansion gap, with stair nosing also available upon request.

Where can Adare be installed?

Our Adare Laminate collection features an AC4 Abrasion Rating meaning that it can be installed in even the highest traffic areas of the home (such as entryways and hallways) as well as commercial settings where heavy foot traffic is expected. Although suitable for installation in areas of the home such as kitchens and laundries, Adare is not suitable for use in wet areas such as bathrooms. This is because they are not considered a waterproof system.

Why isn't Adare considered waterproof? It has a waterproof surface?

Adare is not considered a waterproof floor as Laminate is not a waterproof system by nature. This means that although the surface of our Adare floorboards is 100% waterproof thanks to the Aluminium Oxide wear layer, the floorboard itself is not waterproof.

Is Adare recyclable?

All Imagine Floors by Airstep Laminate flooring is 100% recyclable.

Adare Laminate FAQs cont.

What is the difference between "fold" and "clik" installation methods?

Floors that use UNICLIC® locking technology can be installed with either a "fold" or "clik" installation style. The differences between these are explained in-depth in a video from the creator, UNILIN, which can be accessed by clicking or tapping any of the images below.

The diversity of method in which floors that use the UNICLIC® locking system can be installed greatly improves ease of installation, especially in areas where it can be hard to use the traditional folding method such as near doors and walls.

Does Adare require underlay?

As a general rule, all floating flooring systems recommend the installation of underlay beneath your floorboards. You can find recommendations for underlay products that pair well with our Adare collection within this document.

What is the maximum raft size for Adare?

Adare can be installed in a raft size up to 10m wide and 12m long. If these dimensions are exceeded compartmentalisation is required and expansion trims must be used. Please refer to the Installation Guidelines for further information and instructions.

What should I do if I have further questions?

If you have further questions after reviewing these FAQs we suggest visiting the FAQ page of the Imagine Floors website by clicking or tapping the button below. If you still have questions after reviewing this page, you can contact your Sales Representative or get in touch with our Customer Service Department by calling +613 9794 3888.
