LAMINATE

*Beautiful but Tough*

**CARPET COURT**

*Wake up to a good morning  
every day with our Kalimera  
Laminate flooring collection.*

Exclusive to Carpet Court, the Kalimera range of Laminate flooring is an Embossed In Register collection of true-to-life Oak inspired designs that live up to the meaning of their collection name – good morning. Featuring eight décor options that feel as good as they look, Kalimera is sure to suit your style, whatever it may be.

These child and pet friendly Laminate floors are protected from spills for up to 72 hours thanks to their water-resistant aluminium oxide surface and bevel edges, and their AC4 rating means they can be installed in even the highest traffic areas of your home. In fact, the Kalimera collection is so resistant to general wear and tear that these floorboards can even be installed in general commercial settings, so you know they'll happily stand up to everyday life in your home.

Featuring a superior UNICLIC® locking system, the Kalimera Laminate flooring range offers enhanced stability and is incredibly low maintenance – simply install them as per the Installation Instructions and follow the Cleaning and Maintenance Instructions once your floors are laid, and your new Kalimera floors will stay stunning for years to come. They're also covered by a 25 Year Residential Warranty, as well as a 5 Year Commercial Warranty, so you can welcome them into your home with extra peace of mind.

Enjoy an ultra-light finish with the gentle creamy grey shades of Winter Oak and Hazey Oak or create a dark and mysterious space with the deep tones Storm Oak or Notte Oak. Those who prefer cooler undertones will find that both Summer Oak and Spring Oak suit their needs, while Sunny Oak and Autumn Oak effortlessly provide more warmth to any space.

There's something for everyone in the Kalimera collection, and your friendly flooring specialists at your local Carpet Court store will be happy to assist you in finding the right Laminate floor for your needs.

Meaning good morning, the Kalimera collection of Laminate flooring is embossed in register so it feels as good as it looks. Featuring an AC4 rating, these floorboards are suitable for installation in even the highest traffic areas of the home while 72 hour spill protection provides added durability. Child and pet friendly, and complete with eight stunning oak decors, the Kalimera Laminate range makes use of a superior UNICLIC locking system which improves both ease of installation and flooring stability.

# What is Kalimera?

Kalimera is a collection of 1215mm Laminate floorboards available in eight European Oak décors. Featuring an 8mm thick construction, our Kalimera floors are crafted from the below components:

# What are the benefits of Kalimera Laminate?

The UNICLIC® system features four locking points and allows for two different methods of installation - fold and click. This greatly improves ease of installation while also enhancing the integrity of the lock.

72 hour spill protection helps ensure that the entirety of your new Laminate flooring system is highly durable and able to withstand daily life.

The Aluminum Oxide wear layer on the Kalimera collection of flooring helps provide a 100% water-resistant surface. It's also highly resistant to scratches, dents, fading and burns.

An Embossed in Register finish means that your floorboards feel as good as they look. With texture designed to perfectly align with the décor, this finish is as close to natural as you can get in Laminate.

Kids and pets are highly unpredictable, and as much as we love them, they can cause havoc in the home. The good news is that the Kalimera range is able to withstand the unpredictability of everyday life - whether it's the kids spilling a drink or the pet having an accident.

An AC4 Abrasion Rating means that all options within the Kalimera collection are suitable for installation in even the highest traffic areas of the home as well as commercial spaces with heavy foot traffic.

The Kalimera collection is designed to be low maintenance and easy to clean. Simply follow the Cleaning & Care Guide and enjoy your floors for years to come.

A 25 Year Residential Warranty covers the entire Kalimera range, so you can install these floors in your home with confidence as long as appropriate guidelines are followed.

A 5 Year Light Commercial Warranty is available when Kalimera floorboards are installed in commercial settings as long as appropriate guidelines are followed.

As the Kalimera collection of Laminate flooring has a closed surface which does not trap dust or allergens it is considered an allergy-friendly flooring option.

# Kalimera Laminate FAQs

## Where does Kalimera sit in the Imagine Floors by Airstep product offering?

Kalimera is the Imagine Floors by Airstep 8mm European Oak collection of Laminate flooring. At 1215mm it provides a standard length flooring option for consumers and is the sister range of our Adare 12mm Laminate floors. These ranges provide an alternative to Australian inspired décors (which can be found in The Eucalyptus Steps Collection) and offer 16 designs between them.

## What makes Kalimera special?

Kalimera offers eight stunning décors that combine true-to-life aesthetics with an embossed in register design. This means that they are as close to the real deal as possible, with lower maintenance and protection requirements than Timber floors. They also feature a UNICLIC® locking system, which allows them to be installed in two different manners, and have an Aluminium Oxide wear layer that makes them highly resistant to scratches, dents, burns, stains and fading.

## What is the UNICLIC® lock system?

UNICLIC® is a locking system for floors which has four locking points. This unique set up allows floors to be installed in either a "fold" or "click" method, while also enhancing the stability of the connection between individual floorboards.

## What's so good about an Aluminium Oxide coating?

While most types of flooring available for homes has a PU Coating (water based polymer) Laminate floors have an Aluminium Oxide coating. This greatly enhances their resistance to scratches and damage, and means your floors will stay looking, and feeling, better for longer, even in high traffic residential spaces and commercial areas.

## What expansion gap is needed?

A minimum 10mm - 12mm expansion gap is required when installing Kalimera Laminate. This is standard for all floating floors. All décors within the Kalimera collection of Laminate flooring from Imagine Floors by Airstep have 20mm colour match scotia available to cover the expansion gap, with stair nosing also available upon request.

## Where can Kalimera be installed?

Our Kalimera Laminate collection features an AC4 Abrasion Rating meaning that it can be installed in even the highest traffic areas of the home (such as entryways and hallways) as well as commercial settings where heavy foot traffic is expected. Although suitable for installation in areas of the home such as kitchens and laundries, Kalimera is not suitable for use in wet areas such as bathrooms. This is because they are not considered a waterproof system.

## Why isn't Kalimera considered waterproof?

Kalimera is not considered a waterproof floor as Laminate is not a waterproof system by nature. This means that although the surface of our Kalimera floorboards is water-resistant thanks to the Aluminium Oxide wear layer, the floorboard itself is not waterproof.

## Is Kalimera recyclable?

All Imagine Floors by Airstep Laminate flooring is 100% recyclable.

# Kalimera Laminate FAQs cont.

## What is the difference between "fold" and "clik" installation methods?

Floors that use UNICLIC® locking technology can be installed with either a "fold" or "clik" installation style. The differences between these are explained in-depth in a video from the creator, UNILIN, which can be accessed by clicking or tapping any of the images below.

The diversity of method in which floors that use the UNICLIC® locking system can be installed greatly improves ease of installation, especially in areas where it can be hard to use the traditional folding method such as near doors and walls.

## Does Kalimera require underlay?

As a general rule, all floating flooring systems recommend the installation of underlay beneath your floorboards. You can find recommendations for underlay products that pair well with our Kalimera collection within this document.

## What is the maximum raft size for Kalimera?

Kalimera can be installed in a raft size up to 10m wide and 12m long. If these dimensions are exceeded compartmentalisation is required and expansion trims must be used. Refer to Installation Instructions for further requirements and information.

## What should I do if I have further questions?

If you have further questions after reviewing these FAQs we suggest visiting the FAQ page of the Imagine Floors website by clicking or tapping the button below. If you still have questions after reviewing this page, you can contact your Sales Representative or get in touch with our Customer Service Department by calling +613 9794 3888.

## Colour Match Scotia

All Laminate floors require an expansion gap due to their floating nature, and the Imagine Floors by Airstep Kalimera collection is no exception. To help improve both safety and aesthetics when leaving an expansion gap, it is a good idea to install scotia around the edge of your room and / or any fixed elements (such as island benches and cupboards within your space).

In order to allow for the creation of a seamless design, we have developed colour match scotia for all decors within the Kalimera range. This 20mm thick accessory easily hides expansion gaps and provides a smooth transition from your floor to any vertical surface within your space.

## Colour Match Stair Nosing

Although not applicable for all homes, stair nosing is an ideal solution to create a seamless finish in homes with staircases and / or split levels.

Each step on a staircase must be sealed for durability and stair nosing makes this easy. It also creates a seamless continuation of the floors across levels of your home.

All décors within the Kalimera collection have colour match stair nosing available upon request.
