FLOORING

EXTRA-LONG BOARDS

Create bold, Inxurious style in your space with our Ridgeline Laminate flooring collection.

If you're looking for an extra-large floorboard to make a statement and add a touch of luxury to your home, look no further than the Ridgeline range of Laminate floors. Exclusive to Flooring Xtra, this collection features twelve stylish decors that are perfect for creating a bold design base.

Offering a versatile selection of colours, Ridgeline presents a mixture of warm and cool tone flooring options ranging from super light shades such as Mother Of Pearl and Cotton Oak through to deep shades such as Landmark Oak and Torte. With the exception of Willow, Keystone, Torte and Mother Of Pearl – which offer woodgrain embossing – the Ridgeline collection of Laminate flooring is an embossed in register range. This means that you can enjoy true-to-life detail in terms of both look and feel, making Ridgeline a great choice for those hunting a natural vibe in their home.

Child and pet friendly, and crafted with a 12mm, extralong construction, this collection is highly resistant to general wear and tear. An AC4 rating ensures that Ridgeline is suitable for installation in even the highest traffic areas of the home, as well as general commercial settings, and a superior UNICLIC[®] locking system enhances stability. You'll also enjoy 72-hour spill protection thanks to Ridgeline's aluminium-oxide wear layer and bevelled edge, meaning you don't have to panic if something spills in the kitchen, your pet has an accident or one of your children drops their drink in the lounge. In addition to these perks, Ridgeline is covered by a 25 Year Residential Warranty and 5 Year Commercial Warranty, so you can install your new floorboards with confidence.

FOR every AUSTRALIAN HOME

asy to Clean & Maintain

What is Ridgeline?

Ridgeline is a collection of 2200mm extra long Laminate floorboards available in ten European Oak décors and two Australian native inspired designs.

Featuring a 12mm thick construction, our Ridgeline floors are crafted from the below components:

오 Aluminum Oxide Wear Layer

This hard wearing surface is highly resistant to scratches and offers increased protection against fading, stains and burns. Ideal for homes with children and pets this layer provides a 100% waterproof surface.

Imagine Floors Décor

Available in 12 designs, the décors within our Ridgeline range offer true-to-life visuals for an authentic design. Eight of these designs are Embossed in Register, with the remaining four offering a woodgrain embossing so they feel as good as they look.

OHDF Core

Short for High Density Fibreboard, the HDF core of our Ridgeline Laminate floors offers high impact resistance and enhanced stability for the floorboard. This layer includes the UNICLIC® locking system used with the Ridgeline collection which greatly improves ease of installation and the integrity of the lock.

Ⴆ Balancing Layer

This layer balances the floorboard, creates a solid foundation for the flooring system and provides dimensional stability.

What are the benefits of Ridgeline Laminate?

The UNICLIC^{®®} system features four locking points and allows for two different methods of installation fold and click. This greatly improves ease of installation while also enhancing the integrity of the lock.

72 hour spill protection helps ensure that the entirety of your new Laminate flooring system is able to withstand the unpredictability of everyday life - whether it's the kids spilling a drink or the pet having an accident.

The Aluminum Oxide wear layer on the Ridgeline collection of flooring helps provide a 100% waterproof surface. It's also highly resistant to scratches, dents, fading and burns.

An Embossed in Register finish is available on eight decors within Ridgeline with the remaining four featuring a woodgrain feel. This means that your floorboards feel as good as they look.

Kids and pets are highly unpredictable, and as much as we love them, they can cause havoc in the home. The good news is that the Ridgeline range is highly durable and able to withstand daily life.

KIDS & PETS FRIENDLY

An AC4 Abrasion Rating means that all options within the Ridgeline collection are suitable for installation in even the highest traffic areas of the home as well as commercial spaces with heavy foot traffic.

The Ridgeline collection is designed to be low maintenance and easy to clean. Simply follow the Cleaning & Care Guide and enjoy your floors for years to come.

A 25 Year Residential Warranty covers the entire Ridgeline range, so you can install these floors in your home with confidence as long as appropriate guidelines are followed.

A 5 Year Light Commercial Warranty is available when Ridgeline floorboards are installed in commercial settings as long as appropriate guidelines are followed.

As the Ridgeline collection of Laminate flooring has a closed surface which does not trap dust or allergens it is considered an allergy-friendly flooring option.

Ridgeline Laminate FAQs

Where does Ridgeline sit in the Imagine Floors by Airstep product offering?

Ridgeline is the Imagine Floors by Airstep 12mm European Oak collection of Laminate flooring. At 2200mm in length it provides an extra long flooring option for consumers and is the sister range of our Habitat 8mm Laminate floors. These ranges provide an alternative to Australian inspired décors (which can be found in The Eucalyptus Steps Collection) and offer 24 designs between them.

What makes Ridgeline special?

Ridgeline offers eight stunning décors that combine true-to-life aesthetics with an embossed in register design. This means that they are as close to the real deal as possible, with lower maintenance and protection requirements than having Timber flooring in your home. They also feature a UNICLIC[®] locking system, which allows them to be installed in two different manners, and have an Aluminium Oxide wear layer that makes them highly resistant to scratches, dents, burns, stains and fading.

What is the UNICLIC® lock system?

UNICLIC[®] is a locking system for floors which has four locking points. This unique set up allows floors to be installed in both a "fold" and "clic" method, while also enhancing the stability of the connection between individual floorboards.

What's so good about an Aluminium Oxide coating?

While most types of flooring available for homes has a PU Coating (water based polymer) Laminate floors have an Aluminium Oxide coating. This greatly enhances their resistance to scratches and damage, and means your floors will stay looking, and feeling, better for longer, even in high traffic residential spaces and commercial areas.

What expansion gap is needed?

A minimum of 10mm - 12mm expansion gap is required when installing Ridgeline Laminate. This is standard for all floating floors. All décors within the Ridgeline collection of Laminate flooring from Imagine Floors by Airstep have colour match 20mm scotia available to cover the expansion gap, with stair nosing also available upon request.

Where can Ridgeline be installed?

Our Ridgeline Laminate collection features an AC4 Abrasion Rating meaning that it can be installed in even the highest traffic areas of the home (such as entryways and hallways) as well as commercial settings where heavy foot traffic is expected. Although suitable for installation in areas of the home such as kitchens and laundries, Ridgeline is not suitable for use in wet areas such as bathrooms. This is because they are not considered a waterproof system.

Why isn't Ridgeline considered waterproof? It has a waterproof surface?

Ridgeline is not considered a waterproof floor as Laminate is not a waterproof system by nature. This means that although the surface of our Ridgeline floorboards is 100% waterproof thanks to the Aluminium Oxide wear layer, the floorboard itself is not waterproof.

Is Ridgeline recyclable?

All Imagine Floors by Airstep Laminate flooring is 100% recyclable.

Ridgeline Laminate FAQs cont.

What is the difference between "fold" and "clic" installation methods?

Floors that use UNICLIC[®] locking technology can be installed with either a "fold" or "clic" installation style. The differences between these are explained in-depth in a video from the creator, UNILIN, which can be accessed by clicking or tapping any of the images below.

The diversity of method in which floors that use the UNICLIC[®] locking system can be installed greatly improves ease of installation, especially in areas where it can be hard to use the traditional folding method such as near doors and walls.

Does Ridgeline require underlay?

As a general rule, all floating flooring systems recommend the installation of underlay beneath your floorboards. You can find recommendations for underlay products that pair well with our Ridgeline collection within this document.

What is the maximum raft size for Ridgeline?

Ridgeline can be installed in a raft size up to 10m wide and 12m long. If these dimensions are exceeded compartmentalisation is required and expansion trims must be used. Please refer to the Installation Guidelines for further information and instructions.

What should I do if I have further questions?

If you have further questions after reviewing these FAQs we suggest visiting the FAQ page of the Imagine Floors website by clicking or tapping the button below. If you still have questions after reviewing this page, you can contact your Sales Representative or get in touch with our Customer Service Department by calling +613 9794 3888.

Accessory Options for Ridgeline Laminate:

Colour Match Scotia

All Laminate floors require an expansion gap due to their floating nature, and the Imagine Floors by Airstep Ridgeline collection is no exception. To help improve both safety and aesthetics when leaving an expansion gap, it is a good idea to install scotia around the edge of your room and / or any fixed elements (such as island benches and cupboards within your space.

In order to allow for the creation of a seamless design, we have developed colour match scotia for all decors within the Ridgeline range. This 20mm thick accessory easily hides expansion gaps and provides a smooth transition from your floor to any vertical surface within your space.

20mm

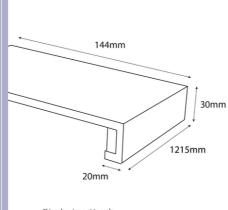

*Line drawing not to scale

Although not applicable for all homes, stair nosing is an ideal solution to create a seamless finish in homes with staircases and / or split levels.

Each step on a staircase must be sealed for durability and stair nosing makes this easy. It also creates a seamless continuation of the floors across levels of your home.

All décors within the Ridgeline collection have colour match stair nosing available upon request.
